Files for Nudge mode

All files need by the nudge mode (wind, temperature, pressure etc.) are stored under subipsl project.

Subipsl data are protected in read, you need to subscribe the group to be allowed to read these data

2. limit.nc files

We create data set of limit.nc files need by LMDZ model for several initial boundaries files (ice and sea surface temperature). They are store on the IGCM/ATM/LIMIT/ directory. Data initial boundaries files are :

- ERAI
- AMIP
- simulation CMIP6 performed by IPSL
- HadISST
- ERA5
