

Sea Ice WG

NEMO DevCom, 2nd July 2021

Ed Blockley & Martin Vancoppenolle

Sea ice: NDS main issues

- Main issues
 - Documentation
 - Modularity/interfaces (waves, bgc)
 - Sea ice representation
- Current position: evolution or revolution?
- Interaction with other WGs/chapters:
 - Waves/ABL, HPC, Data Assimilation, AGRIF
 - Overarching issues (evaluation, shared tools, test cases, ...)
- Stakeholder (TOP, WAVES, CMEMS, climate centres) requirements needed
- Polar oceanography: who deals with ice-related parameterizations in the ocean?
